

EinScan-SP 3D Scanner

EinScan-SP 3D Scanner

Tool Type: 3D Scanner
Location: Innovation Workshop
Description: 3D Scanner
Manufacturer: EinScan

About

The SHINNG3D EinScan-SP 3D Scanner is located within Fume Hood #1 under the blackout curtains. A part can be placed on the central turn table which will rotate as the scanner projects light onto the object being scanned. Transparent, reflective, or very dark surfaces are inherently difficult to scan, coating the surface with powder may aid the quality of the scan. Calibration of the 3D scanner can aid in scan accuracy, and should be done before scanning the first object.

Training Documentation
