FBS tutorial: [Making reservations in the Microfluidics Lab and Innovation Workshop](#)

We require that you make a reservation to use our tools. This helps us keep track of billing and tells us who to contact if the job you were running fails. It also ensures that the tool you are planning to use will be available for you when you come into the lab.

For 3D prints, run the estimator on an appropriate 3D printing software (Ultimaker:Cura, Formlabs:PreForm, both free to download) on your computer before you come in, report the amount of material it says you will use, and make your reservation for the amount of time it says it will take to print.
