

# MiiCraft 50 3D Printer

<b>MiiCraft 50</b>

<b>Tool Type:</b> 3D printer
<b>Location:</b> Innovation Workshop
<b>Description:</b> High-resolution resin DLP 3D printer for microfluidics tool fabrication.
<b>Manufacturer:</b> Miicraft

Last updated 1/4/23 Haley

---

## About

### This tool has been retired

The MiiCraft 3D printer is located in Elings Hall 2442. It is a Digital Light Processing (DLP) printer, which is functionally similar to SLA printing but uses a projected light source rather than a laser. With its proprietary resin, this printer is capable of printing small, high-resolution parts. The MiiCraft is commonly used to print molds for microfluidic devices due to its high accuracy.

---

## Safety Concerns

The resin used for casting PDMS molds is highly toxic.

- Wear gloves and a lab coat when handling.
- Follow proper fume hood procedure when cleaning parts.
- Transport prints in dedicated transport containers to prevent resin spillage.
- Dispose of liquid waste in labeled waste jugs and solid waste in the yellow waste bin

## Detailed Specifications

Build Volume: 57x32x120 mm  
XY Resolution: 30  $\mu$ m  
Layer Thickness: 5-200  $\mu$ m
