| MiiCraft 50 |
|  |
| Tool Type: 3D printer |
| Location: Innovation Workshop |
| Description: High-resolution resin DLP 3D printer for microfluidics tool fabrication. |
| Manufacturer: MiiCraft |

Last updated 1/4/23 Haley

About

The MiiCraft 3D printer is located in Elings Hall 2442. It is a Digital Light Processing (DLP) printer, which is functionally similar to SLA printing but uses a projected light source rather than a laser. With its proprietary resin, this printer is capable of printing small, high-resolution parts. The MiiCraft is commonly used to print molds for microfluidic devices due to its high accuracy.

Safety Concerns

The resin used for casting PDMS molds is highly toxic.

- Wear gloves and a lab coat when handling.
- Follow proper fume hood procedure when cleaning parts.
- Transport prints in dedicated transport containers to prevent resin spillage.
- Dispose of liquid waste in labeled waste jugs and solid waste in the yellow waste bin

Detailed Specifications

Build Volume: 57x32x120 mm
XY Resolution: 30 μ m
Layer Thickness: 5-200 μ m
