

Recharge Rates

The Innovation Workshop recharge is based on the time spent using tools or space in the lab. This is measured using reservations in FBS. Therefore, **all lab use must be recorded through FBS reservations.**

For active use of the lab, which includes tools like the microscope, machine tools, laser cutter, etc., your reservation time should match the time that you spend working in the lab.

For passive tools, such as the silane chamber and 3D printers, your reservation time should match the total time that your tool is in use. (i.e. the total duration of the print or the total duration of silane deposition)

Below is a list of the most recently approved rates below:

Tool or Service	Internal Rate	Incubator Rate	External Rate
