Operating Procedures

Training required for independent operation

- 1) Reserve this tool through FBS under "PDMS Tools"
 - 2) When you arrive, ensure that CDA and vacuum are functional and that the spin-coater bowl is lined with paper towels.
 - 3) Program or select your desired recipe (Steps, Spin Speed, Acceleration, Spin Time) and an appropriate chuck adapter, if needed.
 - 4) Place your substrate, centered, on the chuck and then press the 'Vacuum' button.
 - 5) Dispense your resin onto your substrate, try to use as little as necessary for a uniform coating.
 - 6) Close the lid, then run your recipe.
 - 7) When the recipe is complete, open the lid, turn off the vacuum by pressing the 'Vacuum' button again, and retrieve your coated substrate.
 - 8) Repeat for as many samples as required.
 - 9) When finished, if paper towel liners are very dirty, please replace them. Thank you!
-
