Thinky ARE-310 Mixer	
	
Tool Type: PDMS	
Location: mFL 3430	
Supervisor	Tool Lead
David Bothman	Brian Dincau
(805) 893-4125	(661) 917-7355
bothman@cnsi.ucsb.edu	bdincau@ucsb.edu
Description: PDMS tool	
Manufacturer: Thinky	

About

The Thinky Mixer is one of the PDMS tools in the Microfluidics lab. This machine is used for mixing and de-aerating the elastomers that are used in fabrication of microfluidic devices. The mixing time and revolution speed of the device can be programmed using the machine's controller interface.

Safety Concerns

Goggles, gloves, a lab coat, long pants, and close-toed shoes should be worn while operating this machine. Long hair should be tied back. Review Sylgard 184 resin SOP before handling.

Training Documentation

thinky_are-310_mixer_programming_handout.pdf

Detailed Specifications

- 310g capacity
 - Centrifugal force of over 400G
 - Cold-insulated, heat-resistant adapter enables support of various material characteristics
 - Memory and step-operation functions for controlling and executing operating condition
 - 2 modes of mixing and deaeration achieve dispersion and deaeration of high-viscosity materials in a small amount of time
-
