

# Xytronic LF-853D Soldering Station

Soldering Station
 A black, multi-functional rework station with a carrying handle. It features a digital display and several control buttons. In front of it are various accessories: a soldering iron, a desoldering braid, and a pair of tweezers.
<b>Tool Type:</b> Electronics / joining tool
<b>Location:</b> Innovation Workshop
<b>Description:</b> Soldering iron
<b>Manufacturer:</b> Xytronic

## About

This tool is used to melt solder with its soldering iron or hot air station. This multi function rework station has a max heat output of 900W and can be used for hot air, soldering, and desoldering.

## Safety Concerns

This tool generates heat! Do not set directly on bench, do not leave tool operating without supervision.

## Operating Procedures

- Secure the workpiece using the soldering hands.
- Heat the joint/wire to be soldered.
- Apply solder to the joint/wire using the soldering iron. Apply heat until the temperature of the iron equilibrates.
- Remove the iron from the joint. Use the desoldering braid located in the soldering supply bin if desoldering is needed.

## Detailed Specifications
